Border Guide Foot

Having problems lining up or evenly spacing rows of decorative stitching?

Janome's Border Guide Foot, helps you to easily match up your stitch rows, by using the red lines on the foot. No need to mark every row beforehand! The secret to the border guide foot lies in the red guide marks. The two sets of vertical red lines are calibrated to allow perfect spacing of rows. The horizontal red line matches the needle drop, assisting you to line up the start point of each row.

The small red mark denotes centre needle position; plus this mark is very useful when stitching the first row of your decorative stitch building. It is recommended, you mark a line on your fabric for the first line of stitching, when sewing the small red mark sits on the marked line.

This Accessory of the Month has a bonus project using the Border Guide Foot.
