OVERLOCKER SERIES

8004D

JANOME

8004D Features

Presser foot pressure adjustment	Cutting width: 3.1mm - 7.3mm
Stitch length: 1 - 4mm	Differential feed ratio: 0.5 - 2.25
Easy 2-step upper knife engagement	Instant rolled hem conversion with chaining finger
Built-in thread cutter	Colour-coded threading path with diagram
3/4 thread overlocking	Needle system - HA15xISP (Janome Ballpoint needles)
Instructional DVD	No machine cover
Optional feet available	Weight 8Kg

Easy Rolled Hem Change-Over

No need to change the needle plate for rolled hemming. Just slide the needle plate setting knob to "R" position to convert the plate for rolled hemming.

Differential Feed

The differential feed device is designed to prevent fabrics from puckering or stretching. Both stitch length and differential feed dials can be set at any time, even while sewing.

Adjustable Cutting Width

Depending on the type or thickness of the material you sew, the seams may be too loose or too tight even when the tensions are correctly adjusted. In these cases, you can easily adjust the cutting width with this dial to correct the seam tension.

Ready to Sew

This overlocker is packaged with 4 cones of white overlocker thread. The overlocker is fully threaded and ready to start sewing, once unpackaged.
