Create Something Special

PERFECT SEWING & EMBROIDERY

SKYLINE  S9

Great Built-In Embroidery

250 built-in embroidery designs give you a wide range of styles and motifs for all types of projects. The Skyline S9 also includes 40 exclusive designs by Anna Maria Horner, 20 fonts for monogramming, 104 normal sew designs, and 46 border designs.

Convenience at Your Fingertips

The Easy Convenience Features let you get more out of your sewing time. The most important functions are perfectly placed for effortless access. Start/Stop button, Reverse, Locking Stitch, Needle Up/Down and Thread Cutter are all there. And most importantly: the Automatic Presser Foot Lift.

Imagine it, then Create it!

The full editing suite built into the Skyline S9 includes the functions you need to perfectly customise embroidery for your family and home. Resize, rotate, flip, drag, re-edit, layout 2 and 3 letter monograms – all on the full colour LCD touchscreen.

One Step Needle Plate Conversion

No screws or tools necessary! When using lightweight fabrics or piecing quilts, a straight stitch needle plate makes all the difference. Push the lever to release the plate and snap a different one in place. The Skyline S9 comes with two standard needle plates: Zig Zag and Straight Stitch.

AcuFeed™ Flex

Janome's exclusive AcuFeed Flex fabric feeding system moves layers of your project together under the presser foot with perfect precision from both the top and the bottom. Enjoy this great feature with bulky layers on quilts and thick home décor projects, or for matching plaids and patterns on garments and more.

Built-in Wi-Fi Capability

The Skyline S9's built-in Wi-Fi capabilities make it easy to transfer designs, fine tune embroidery placement and monitor your stitching from anywhere!

Welcome Embroidery into Your Sewing

You're always searching for tips and techniques to make your sewing fresh, better or more unique. The Skyline S9 answers the call with Machine Embroidery. Choose from a range of design options to take your next project in a new direction. Easily add layers of detail, vibrant embellishment or personalised monogramming to your work without specialised techniques or training. Easily upscale any project or ready-made item with a selection from the 250 gorgeous embroidery designs.

Making a House into a Home

The built-in Sashiko quilting designs in the Skyline S9 gives your embroidery projects depth and dimension. This tonal embroidery stitching can change an ordinary table runner into something special.

40 Signature Anna Maria Horner Embroidery Designs

Anna Maria has created a custom collection of embroidery designs for the Skyline S9. Her handwork inspired motifs, folksy florals and cross stitch classics glow with her beautiful, bright palette and intricate charm. From large scale focal designs to smaller accents and elegant borders, these embroideries will complement every project and style.

It's in the Details: The Special Touches that Become Memories

Throw pillows and a turtle tuffet! Fun projects can transform any space. Appliqué adds a unique touch. The 18 built-in appliqué stitches in the S9 are all customisable, and the Cornering Startover function as well as the Automatic Pivoting feature ensure precision stitching. Quilt piecing is a great way to add bursts of colour to a floor pillow or a throw. Seaming and quilting is a breeze with the Skyline's AcuFeed Flex and quilting accessories.

Useful Apps to get the Most out of your Sewing Time

The AcuEdit app gives you the complete Skyline S9 embroidery editing suite right on your iPad®. Easily import designs from your machine and send finished layouts back to the machine for quick stitch out.

Supervise your embroidery stitch outs from outside of your sewing room! The AcuMonitor app alerts you at the end of a design or a thread colour, so you can watch the progress of your embroidery from anywhere in your home.

Camera-Driven Embroidery Placement

The AcuSetter app brings camera technology to design placement for the ultimate in precise, trouble-free embroidery positioning.
