

# JANOME

## Accessory of the Month

March 2020

### 3-Way Cording Foot

On top of the Cording Foot there are three positioning slots for decorative threads. You can use up to 3 threads, to create unique couching to your sewing project. The decorative threads easily feed through the foot, match your sewing thread to the decorative thread or use a contrasting thread for a more distinct look. You may even want to consider a variegated thread as stand out thread option.

Additionally, you can also use this foot for shirring (see below image), by using the thread guides to hold your elastic in place whilst sewing. Nice one!

This Accessory of the Month has a bonus project using the 3-way cording foot.

Press the below link to download the project.
