

JANOME

Accessory of the Month

June 2020

Adjustable Zipper Foot

This is a screw-on foot, the shank is included as part of the foot unit. To attach it to a machine, you need to unscrew and remove your machine foot holder, then attach this adjustable zipper foot and tighten the foot holder screw. There is a slide adjustment on this foot with a stopper screw, it allows the user to select left needle position, centre needle position or right needle position.

You can also, use this foot for piping projects, where the piping cord is larger than usual. Being able to slide the foot, you can set the needle to align with the foot edge for close stitch work. See above image on the left.

This Accessory of the Month has a bonus project using the Adjustable Zipper Foot.
