

# JANOME

## Accessory of the Month

September 2020

### Sliding Guide Foot

The Sliding Guide Foot has many attributes that make edge stitching a breeze. Try it out and see for yourself how useful it is! The sliding guide is easily moved and locked into place, using the lever on the back of the sliding guide. This locking lever is a simple flick-up to unlock and push-down to lock. Convenient scale markings on the foot guide bar are in both millimetres and inches, making it easy to set the foot guide ready for your sewing needs - perfect hems, accurate seaming, stitch building, line quilting, top stitching or a decorative stitch feature.

This Accessory of the Month has a bonus project using the Sliding Guide Foot.
