## Accessory of the Month

November 2020

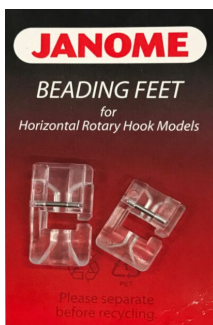

### Beading Foot

Sewing on strung beads, pearls and thicker decorative threads has always been a tedious task but the beading foot now goes some small way to alleviating this and to add pleasure to embellishing. Popular for bridal wear, evening wear, smart/casual or crafts, the beading foot set is a blessing. There are two feet in the 7mm set: narrow groove for beads up to 2mm in diameter and wide groove for beads 2.5 - 4mm in diameter. The 9mm beading feet are available as individual feet not a set of 2.

This Accessory of the Month has a bonus project using the Beading Foot.
