Overlocker Elastic Gathering Attachment

Stitching elastic can be at times a little tricky, especially when you have to stretch your elastic to the size required; the elastic gathering attachment makes this technique a little easier to handle. Use this accessory for attaching narrow elastic (3.5mm - 6mm) to lingerie, knit or woven fabrics. The holding plate ensures that the elastic is in the correct position while thumb screw adjustments alter the amount of gather to suit your project requirements.

This Accessory of the Month has a bonus project using the Overlocker Elastic Gathering Attachment
