

JANOME

Accessory of the Month

June 2021

1/4 Inch Seam Foot O

A popular foot with patchworkers for that essential 1/4 inch seam, as the guide enables you to sew a perfect 1/4 inch seam every time. The guide can also be used wherever a 1/4 inch seam is called for, and when the markings on the needle plate cannot be used, such as, when completing a flat-felled seam. The markings on the left side of the foot denote the needle drop position, a 1/4 inch in front of the needle and a 1/4 inch behind the needle. For the perfect 1/4 inch corners, use your needle plate markings in conjunction with the foot markings. Require a scant 1/4 inch seam, move the needle position to the right, this foot has a semi-circle cut away, as shown above, in the left bottom image.

This Accessory of the Month has a bonus project using the 1/4 Inch Seam Foot.
