Innovative LCD Screen with Fast Navigation and Direct Stitch Selection

Intuitive navigation allows you to quickly locate your stitch choice and setting options using the 10 direct selection buttons. The unique LCD display shows stitch pattern image and mode as well as helpful sewing information.

Large extension table

Standard accessories

Superior Plus Feed System

Only Janome machines have this super stable feeding system that moves your fabric in perfect synchronization with the needle and bobbin. A seven-piece feed dog works with a flat feed mechanism, which keeps the feed dogs parallel to the needle plate whether sewing forwards or backwards.

Foot Pressure Dial and Opening Face Plate

There are 6 levels of foot pressure available, for stitching the lightest of fabrics, to a heavy denim or a quilt sandwich. The face plate (*side cover above the needle area*) opens giving access to the threading path, if thread issues occur and for easy access to cleaning.

Fully Automatic Sensor Buttonholes

Drop your button into the sliding button holder and the foot makes the buttonhole, the right size every time. Choose from 12 styles including square, rounded, keyhole, heirloom, and welted.

Knee Lift

This machine has a knee lift function. The connection hole is located on the bottom right of the machine front. The knee lift is operated by your right leg when seated in front of the machine. Push the knee lift to the right and the sewing foot on the machine is raised, release the knee lift to lower the foot. This function is a time saver and easy to use.
