

JANOME

Accessory of the Month

November 2021

Open-Toe Satin Stitch Foot (F2)

This foot is supplied with some of our Janome models, it is also known as a Custom Crafted Zig Zag Foot.

Designed with a bevelled underside and two outer footings with metal base strips. Having a small footprint, makes it ideal for sewing dense satin stitches or decorative stitch patterns, as the foot travels smoothly over sewn stitches, without compressing or flattening, leaving a decorative raised finish. The clear plastic and open-toe, makes for easy viewing while stitching; plus a centre needle mark on the foot, indicates the centre needle drop position; the sewer can confidently follow a marked line on fabric, using the centre needle position marker.

This Accessory of the Month has a bonus project using the Open-Toe Satin Stitch Foot (F2).
