Overlocker Cloth Guide

The overlocker cloth guide allows you to keep seams straight as you sew. It is especially useful on flatlock seams and other seams where the upper knife is lowered. The 1200D cloth guide and attachment, is not only used for guiding and seaming straight fabric edges, it also helps overlock a curved fabric edge and a straight fabric edge together. This technique is used in commercially made home décor items, such as knife edge pillows and bedspreads, also ideal for making table linens and bags with curves.

This Accessory of the Month has a bonus project using the Overlocker Cloth Guide.
