

JANOME

Accessory of the Month

March 2022

Professional Grade HP Foot & Professional Grade HP Needle Plate

A combination of a professional slim foot and special matching needle plate for high speed straight stitching, these 2 accessories work together as a unit. The slim industrial-like foot utilizes the left side feed dogs, making it ideal for stitching curves and precise topstitching; experience the great ease of control and superior visibility it offers. It's sized perfectly for creating 1/4" seams. This foot will surely become a go-to item for accurate piecing even for curves and small pieces of fabric!

This Accessory of the Month has a bonus embroidery project.
