Accessory of the Month

April 2022

Clear View Quilting Foot and Guide Set

We all know that at times the guide on the 1/4" seam foot can be "in the way" and often wish that we could remove it when needed, well now you can. When you want the benefit of guides for piecing or ditch quilting, they can now be attached and removed as needed, to suit the task at hand. This clear view foot allows you to see through to the fabric, whilst the red guide lines, help you to achieve accurate piecing without any obstruction. There is also the added bonus of an oval shaped needle hole which allows needle adjustment for scant 1/4" piecing with maximum adjustment of 1mm. Markings on the foot indicate 1/8" and 1/4" from centre needle drop position with handy cornering markings for both measurements.

This Accessory of the Month has a bonus embroidery project.
