### Long Quilting Guide Bar Set

The Long Quilting Guide Bar Set is a “must have” accessory to stitch perfect rows. The extra-long format allows for spacing up to 10.5cm / 4¼”, that is approximately two times wider, than rows made with the regular quilting guide.

This set includes a Guide Bar for both right and left placements, and the bonus is, they fit any top-loading Janome sewing machine. For the Quilter, use with the AcuFeed feet or Even Feed foot to create the perfect grid quilting or a feature of multiple straight-line quilting. Borders of decorative stitching can be achieved on garments, using the Satin Stitch Foot (F) or the Open-toe Satin Stitch Foot (F2). These guides can be used with a variety of feet, to achieve your creative project.

This Accessory of the Month has a bonus embroidery project.
