Accessory of the Month

June 2023

Bobbin Holder for Free Motion Quilting and Hand-look Stitching [Blue Dot]

The majority of Janome Bobbin Holders have a coloured dot, the most common being the red dot bobbin holder for everyday sewing or when embroidering using Janome bobbinfil thread.

This bobbin holder is often called the Blue Dot Bobbin Holder. It is preset with a lower tension, making it easier to achieve even tension control when free motion quilting or using the machines built-in hand-look stitches.

Do you have issues with your free motion stitching? We use a free motion foot, so why not also use a bobbin holder made for free motion work. Stitch smarter and enjoy your creative passion.

This Accessory of the Month has a bonus embroidery project. Project download link [<Re-Usable Gift Bag >](#)

Did you know

Janome have a **Bobbin Holder Cleaner** [Part number 859858007] Used to clean the bobbin area and bobbin holder after sewing with adhesives such as basting sprays, iron-on stabilizer, sticky stabilizer, etc. Cleaning the bobbin area and bobbin holder after using these products can prevent the bobbin holder from jamming as any residual glue will heat up with friction.

Part Number	Compatible Machines
202433008	<i>Exclusive</i> to Continental models: CM17 & CM7P
200445007	All top-loading models <u>with</u> built-in automatic thread cutter 9mm & 7mm <i>Excluding CM7P & CM17</i>
